

I HELP Nontechnical founders turn rough ideas into working software.

Scope, UX, full-stack development, launch support, workflow automation, and useful AI systems, handled directly by one senior product builder.

WHEN TO SEND ME SOMEONE

**THEY NEED THE
RIGHT FIRST
PRODUCT OR
WORKFLOW
SYSTEM, NOT A PILE
OF DEVELOPER
HOURS.**

- 10+** years building products
- DIRECT** senior execution
- FAST** focused scope and feedback

TWO WAYS TO START

LAUNCH WHEN THE PRODUCT IS UNCLEAR.

The 4-Week Launch is for founders who need the first useful version scoped, built, and live. It is best when the goal is a real product users can try, pay for, or react to.

LOWER-FRICTION FIRST STEP

AUDIT WHEN THE WORKFLOW IS UNCLEAR.

The Workflow Audit is for teams that need to find the bottleneck before building. The answer might be software, automation, AI, a cleaner handoff, or no build yet.

THE 4-WEEK LAUNCH

FROM IDEA TO LIVE MVP IN FOUR FOCUSED WEEKS.

A fixed-scope build with weekly demos, direct communication, launch support, and a handoff the founder can own.

01

Scope

Cut the idea to the smallest useful first version.

02

Build

Ship the core product surface, data flow, and integrations.

03

Polish

Tighten UX, copy, payments, launch assets, and feedback loops.

04

Launch

Deploy, hand off, and leave the founder with a product they can own.

RECENT PROOF

FOUNDER LAUNCH, AI PRODUCT, SELLER WORKFLOWS, OPERATIONAL SYSTEMS.

FOUNDER MVP

Palabruno

Helped a nontechnical founder shape and launch a Spanish reading MVP across iOS, Android, and web, including subscriptions, teacher payments, app store assets, UX polish, and public-site copy.

AI PRODUCT

Apartment Finder

Built an AI search product that turns noisy rental listings into evidence-backed decisions, with fixture-based evaluation and measured model-cost tradeoffs.

AI SYSTEMS

Genrupt

Expanded an AI media MVP into a commercial Amazon seller workflow platform with subscriptions, safer async generation, credit accounting, and agent-accessible creative operations.

WORKFLOW SYSTEM

Desarmadero La Torre

Built a searchable digital stockroom so customers could check inventory before calling and staff could spend less time answering repetitive stock questions.

GOOD REFERRALS

BEST FIT FOR FOUNDERS WHO CAN DECIDE AND WANT MOMENTUM.

- A nontechnical founder needs more than implementation of a fixed spec.
- A team has manual review, search, handoff, or decision work that software could simplify.
- The first version needs senior product judgment, UX thinking, and implementation in one place.
- There is enough urgency and decision speed to keep momentum.

ENGAGEMENTS

LAUNCHES START AT \$10,000.

Workflow audits start at \$1,000 and can be credited toward implementation if we move forward.

NEXT STEP

BOOK A PRODUCT ROADMAP CALL.

I will help cut scope, choose the right first step, and tell you whether I am the right fit.
